Century!

# Check 21 Teller

TELLER OPERATIONS FOR THE 21<sup>ST</sup> CENTURY

Active Teller Capture moves proof from a central or back office operation to your front office teller. By integrating Teller Capture with your current teller application, your financial institution can capture and balance transactions at the teller window. This enhances your current branch capture and increases efficiency of your

image exchange operations. Teller Capture provides optimum teller efficiency by serving low-volume retail customers at the teller line, as well as high-volume retail and corporate clients at the back counter.

## FEATURES

- CAPTURE FROM A WIDE RANGE OF DEVICES
- IMAGE QUALITY TESTING
- CAR/LAR AMOUNT RECOGNITION
- VITRUAL DEPOSIT TICKETS
- INTEGRATES CASH DISPENSERS
- DUPLICATE ITEM DETECTION
- FRAUD DETECTION
- FRONT AND BACK OFFICE CAPTURE

## flexible solutions for your business needs

### Retail Banking

Many banks today are looking to reduce operational expense. Teller Capture provides your front office resources with an automated solution which take care of the check and cash transactions by using the latest technology to drive down costs. Any impact on your teller operation is reduced by providing a simple user interface and using CAR/LAR to reduce keying. Captured check and credit data is automatically transferred to your teller application. Cash elements of a transaction can be automatically handled by cash dispensers/recyclers. Overall errors are reduced and occurrences of fraud detected at the teller counter. Transactions from the tellers are consolidated into image cash letters ready for forwarding to the FED or your outsourcer. End of day crises are removed and deposit windows extended. Full audit and reporting are provided for management and audit control.

APERTA PROVIDES A TOTAL END TO END SOLUTION.

### Operating Environment

Because the Active Teller Capture is a windows based solution, it is easily integrated into your current Teller Banking solution whether it runs on a virtual environment or not. Capture devices can be networked to fit into a thin client environment. In addition to capturing the check and cash elements of the transaction Teller Capture can be integrated with cash dispensers or recyclers to provide a completely integrated solution.

For your personalized demonstration of Active Teller Capture contact your local Aperta sales person. If you are not sure who your local representative is send an email to [sales@aperta.com](mailto:sales@aperta.com) or call Dave Gilbert at 317-858-0133.
